Email: vanishaa9837@gmail.com
Mobile: +91-7455849443

SKILLS

- **Languages:** C++, JavaScript, C, PHP, Java, Python
- **Frameworks:** HTML5, CSS, NodeJS, React, Express, jQuery, Tailwind CSS
- **Tools:** MySQL, MongoDB
- **Soft Skills:** Problem-Solving, Adaptability, Critical Thinking, Leadership

PROJECTS

Smart Pest Management |

Dec' 2025

- Created a secure role-based Pest Management System with OTP-verified authentication and separate User & admin dashboards.
- Optimized image-based pest detection and smart pesticide recommendations to support early crop diseases management.
- Enhanced an interactive platform with AI chatbot, pest library, profile, and feedback modules to enhance user experience and system improvement.

Tech Stack: React.js, HTML, CSS, APIs, Database, OTP Authentication

Path Finding Visualizer |

Aug' 2025

- Designed an interactive Pathfinding Visualizer to demonstrate real-time execution of graph algorithms such as Dijkstra's, A*, BFS, and DFS, helping users understand how different algorithms explore nodes and find optimal paths.
- Implemented dynamic grid generation and animation logic using JavaScript/React to visualize algorithm steps — including visited nodes, shortest paths, and obstacle handling — with smooth UI transitions.
- Optimized rendering for performance and clarity, ensuring efficient re-renders even on large grids; demonstrated deep understanding of data structures, algorithms, and front-end optimization.

Tech Stack: JavaScript, HTML5, CSS3, React.js

Moving Company Website |

Apr' 2025

- Built a dynamic web platform for managing moving-service requests, including booking, inquiry forms, and customer data management.
- Implemented server-side scripting (PHP) and database operations (MySQL) to automate service scheduling and store client information securely.
- Ensured a professional, responsive UI with validated input forms and smooth navigation — highlighting full-stack web development and business-oriented problem solving.

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

AI Music Chatbot |

Apr' 2025

- Engineered an AI-driven web application that automatically blends multiple songs into seamless mashups using real-time audio processing.
- Utilized the Web Audio API to control track synchronization, mixing levels, and sound effects with precision.
- Designed a clean, responsive, and interactive UI to enhance user creativity and engagement, demonstrating advanced frontend and audio-processing expertise.

Tech Stack: JavaScript, HTML5, CSS3, Web Audio API, Python

TRAINING

DSA Trainee | *Lovely Professional University (in collaboration with Programming Pathshala)*

Jun' 2025 - Aug' 2025

- Enhanced logical thinking, problem-solving, and code optimization skills through multiple contests on vJudge.
- Collaboratively developed PathFinding Visualizer, a web-based tool demonstrating BFS, DFS, and Dijkstra's ,A* Algorithm.
- Individually built N-Queen Problem Analyzer with Logs, visualizing the backtracking process and solution paths.

CERTIFICATES

• React (Basic) by HackerRank 	Sep' 2025
• Cloud Infrastructure 2025 Certified AI Foundation Associate by Oracle 	Sep' 2025
• Build Generative AI Apps and Solution with No-Code Tools by Infosys Springboard 	Aug' 2025
• ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM by Infosys Springboard 	Aug' 2025
• Computational Theory: Language Principle & Finite Automata Theory by Infosys Springboard 	Aug' 2025
• Master Generative AI & Generative AI tools(ChatGPT & more) by Infosys Springboard 	Aug' 2025
• Java Programming by NeoColab 	May' 2025
• Cloud Computing by Swayam (NPTEL) 	Apr' 2025
• C++ Programming: OOPS & DSA by NeoColab 	Jan' 2024
• Responsive Web Design by freeCodeCamp 	Jan' 2024

ACHIEVEMENTS

Participated in Hackathon of Infotsav'25 Infotsav'25 organized by Atal Bihari Vajpayee-Indian Institute of Information Technology and Management	Oct' 2025
Participated in SIH Selected and participated in the Prototype Round of the national-level Smart India Hackathon	Sep' 2025
Active participant on Codeforces (rating: 950) Learning algorithms and data structures through Codeforces contests	Jul' 2025

CO-CURRICULAR ACTIVITIES

• Community Development with NGO – Sakhi Welfare Foundation 	Jul' 2024
• Technical Workshop – Android Development Jumpstart 	Sep' 2023

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering; CGPA: 8.11	Punjab, India Jul' 2023 - Present
Gurukul International Academy Intermediate; Percentage: 82%	Najibabad, Uttar Pradesh Apr' 2022 – Mar' 2023
Gurukul International Academy Matriculation; Percentage: 85%	Najibabad, Uttar Pradesh Apr' 2020 – Mar' 2021
